## LIGHT MADE FOR INDUSTRY

**„IF THE LUMINAIRE IS NOT SOLID, IT IS NOT MY BRAND.“** Alfred Pracht, founder

There are many unique stories of success - of legendary artists, whose work is familiar to every child today, brilliant scientists, who made the impossible possible, and brands that are recognized all over the world. What they all have in common, is that they all began, a long time ago, as a small, but clever, idea.

And our company, PRACHT, has a similar tradition. We are now able to look back on almost 100 years of company history. We have been able to exert a lasting influence on the market for innovative lighting technology. The brand name, PRACHT, symbolizes luminaires of the highest quality and energy efficiency. Our lighting solutions have long since become established on an international level, and have gained recognition worldwide. A deep understanding of the market and the technology, and a perfect sense for the needs and desires of our customers have always made it possible for us to improve our products innovatively and in pace with the times.
